PROFESSIONAL SUMMARY

Motivated beginner in prompt engineering and AI content tools with foundational experience in writing prompts and experimenting with generative AI models. Possesses basic knowledge of Python and introductory Shell scripting, along with a growing understanding of automation and AI-driven workflows. Has hands-on experience creating AI-generated images with refined styles and developing AI-based books across multiple themes using self-written prompts. Interested in applying AI to content creation, creative design, process improvement, and problem-solving, and eager to build technical and professional skills while contributing positively in an entry-level role in AI, automation, and emerging technologies.

PROFESSIONAL EXPERIENCE

Prompt Engineer
Johan Brown Publishing Pvt. Ltd., Hyderabad
August 2023 – Present

- Writing and optimizing prompts for generative AI models to enhance content quality and accuracy
- Assisted in content structuring and taxonomy development for AI-driven publishing tools
- Collaborated with development teams on prompt testing, analysis, and iterative improvements
- Utilized Bash scripting to automate content processing and eBook generation pipelines
- Documented best practices and created prompt libraries for various content types
- Designed and maintained end-to-end AI content workflows, integrating prompt engineering with automated generation of text, images, and eBook-ready outputs
- Developed style-consistent AI-generated visuals and thematic content using custom prompt frameworks for multi-genre publications.

System Operator / Internet Café Operator
Self-Operated, Hyderabad
2018 – 2023

- Managed daily operations of internet café including customer service and technical support
- Assisted customers with printing, scanning, document processing, and internet services
- Handled billing, inventory management, and customer inquiries efficiently
